

The Netherlands eScience Center

Who are we?

- The Netherlands eScience Center is a national center for **innovative software solutions in academic research**.
- Our Research Software Engineers
 - help researchers interpret results,
 - make tools and methods reusable for the wider research community,
 - co-author research and methodological publications.

January		July	
February	<ul style="list-style-type: none"> • Introduction to deep learning • Good Practices in Research Software Development 	August	<ul style="list-style-type: none"> • Parallel Programming with Python
March	<ul style="list-style-type: none"> • Image Processing with Python • Parallel Programming with Python 	September	<ul style="list-style-type: none"> • Introduction to Deep Learning • Image Processing with Python
April	<ul style="list-style-type: none"> • Good Practices in Research Software Development • Machine learning in python with scikit-learn • Intermediate Research Software Development with Python 	October	<ul style="list-style-type: none"> • Collaborative version control with git and GitHub • Machine learning in python with scikit-learn
May	<ul style="list-style-type: none"> • Introduction to Geospatial Raster and Vector Data with Python • Collaborative version control with git and GitHub 	November	<ul style="list-style-type: none"> • Carpentries instructor training • Reproducible research with R packages
June	<ul style="list-style-type: none"> • GPU programming • Carpentries instructor training 	December	<ul style="list-style-type: none"> • GPU programming • Intermediate Research Software Development with Python

- For exact dates of upcoming workshops (3 months in advance):
esciencecenter.nl/events/?f=workshops
- To be notified about coming up workshops, subscribe to the Newsletter:
eepurl.com/dtjzwP

Do you want us to come and teach a workshop at your organisation?

Our Digital Skills Workshops are **open to all researchers in the Netherlands.**

We also offer paid options of standard and custom workshops dedicated to your organisation. To learn more, contact:

training@esciencecenter.nl

Do you want to teach with our materials?

- All material that we use is open-source and available online
- We can help you setup workshops, contact training@esciencecenter.nl

NL-RSE brings together the community of people writing and contributing to research software from Dutch universities, knowledge institutes, companies and other organizations to share knowledge, to organize meetings, and raise awareness for the scientific recognition of research software.
